Action C8: Towards a Climate Friendly Land Use Strategy (LULUCF)

Main activities:

- C8.1: Establishment of the LULUCF monitoring system (NG-1, NG-2)
- C8.2 Strategic Plan for Key Measures and Demonstration of Selected Measures (NG-4)
- C8.3: Building Professional and Governance Capacities (NORG-2)
- C8.4: Raising Information and Public Awareness on CCM (NU-4)

Subactivities of the C8 action:

C8.1 Monitoring System	C8.2 Strategic Plan and Demonstration	C8.3 Capacity Building	C8.4 Raising Information and Public Awareness
<ul style="list-style-type: none">• Monitoring design• Sustainability indicators• LULUCF online application• Ex-ante model evaluation• Experimental sites design• LULUCF centralised database	<ul style="list-style-type: none">• Strategic plan – key measures (5 existing, 2 additional)• Demonstration in the pilot areas (3 selected measures)• Restoration of degraded forests (Kočevje, SiDG)• Improvement of wetland management (Park Lj Barje)• Maintenance of permanent grassland (Park Goričko)	<ul style="list-style-type: none">• Assessment of capacities• Train the trainers (7 trainers)• Education and training – Program of Workshops (20 WS in total)• 2 Summer schools	<ul style="list-style-type: none">• Awareness raising campaign (3 jumbo posters, 1 educational video, CCM lectures, 15 Science days etc.)• Cooperation with key stakeholders (ministries, Inter-sectorial Working Group, CCM Partnership etc.)• Action plan for TR of project results

C8.1: Establishment of the LULUCF monitoring system

Expected results:

- I. National design for carbon stock monitoring in the LULUCF sector
- II. Online application for land use interpretation and representation
- III. Design of permanent experimental sites
- IV. Centralized database for LULUCF established
- V. 200 participants educated at workshops
- VI. Indirect effect on CO₂ reduction

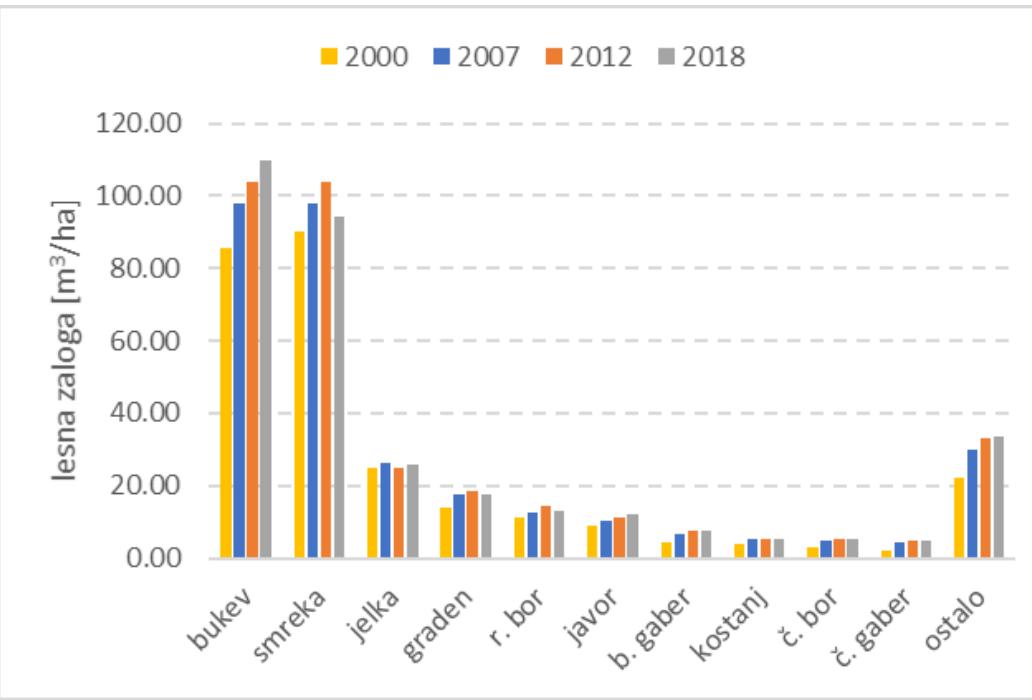

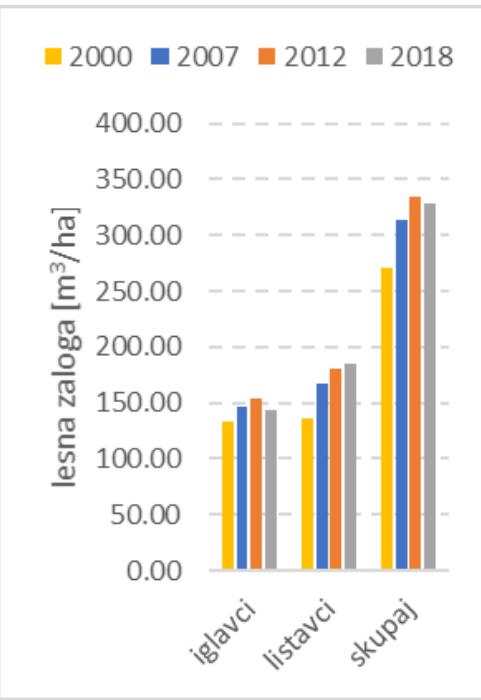

Key stakeholders and main target audience

Key stakeholders:

Slovenia Forest Service
Agricultural Institute of Slovenia
EU LULUCF experts
Ministry of Agriculture, Forestry and Food
Ministry of Economic Development and Technology
The Forest Owners Association of Slovenia
Institute of the RS for Nature Conservation
Ljubljana Marsh Nature Park, Goričko Nature Park
The Surveying and Mapping Authority of the RS
Agency of the RS for Agricultural Markets and Rural Development
The Urban Planning Institute of the RS
Institute for Water of the RS

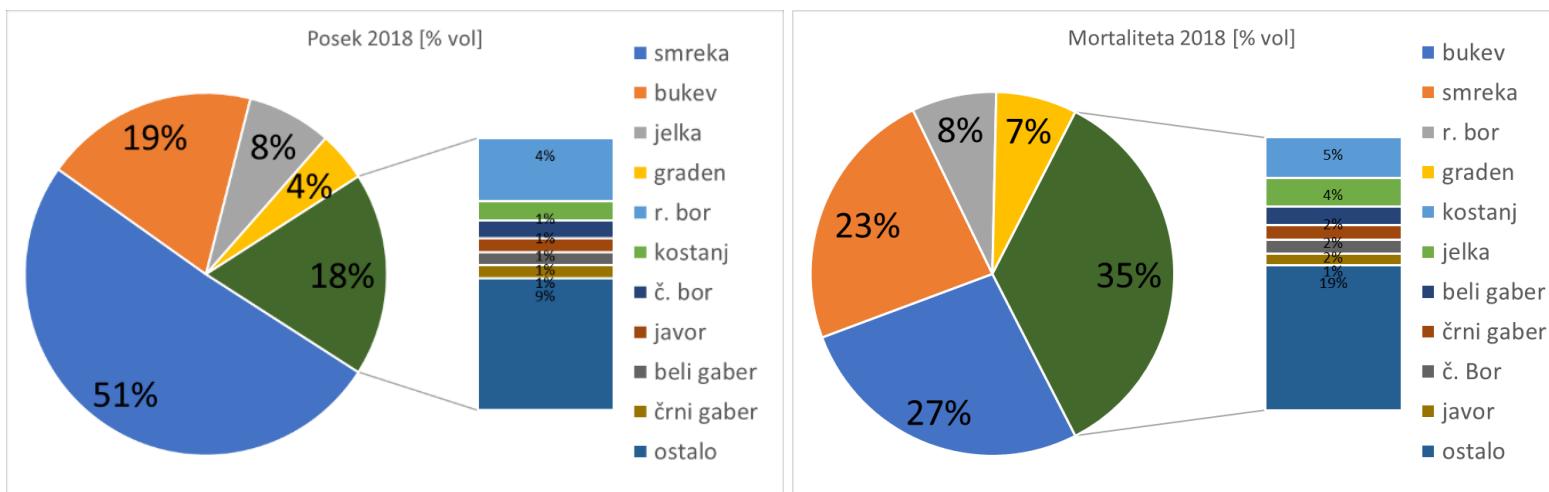

Main target audience:

Land owners
Farmers
Policy makers
Managers of state owned forest and farmland
Statistical Office of the RS
Slovenian Environment Agency
Nature parks
Professors and students
Other experts
Local communities
NGOs
General public

Gozdni prostor – inventura v I. 2018 (NFI; GIS&ZGS)

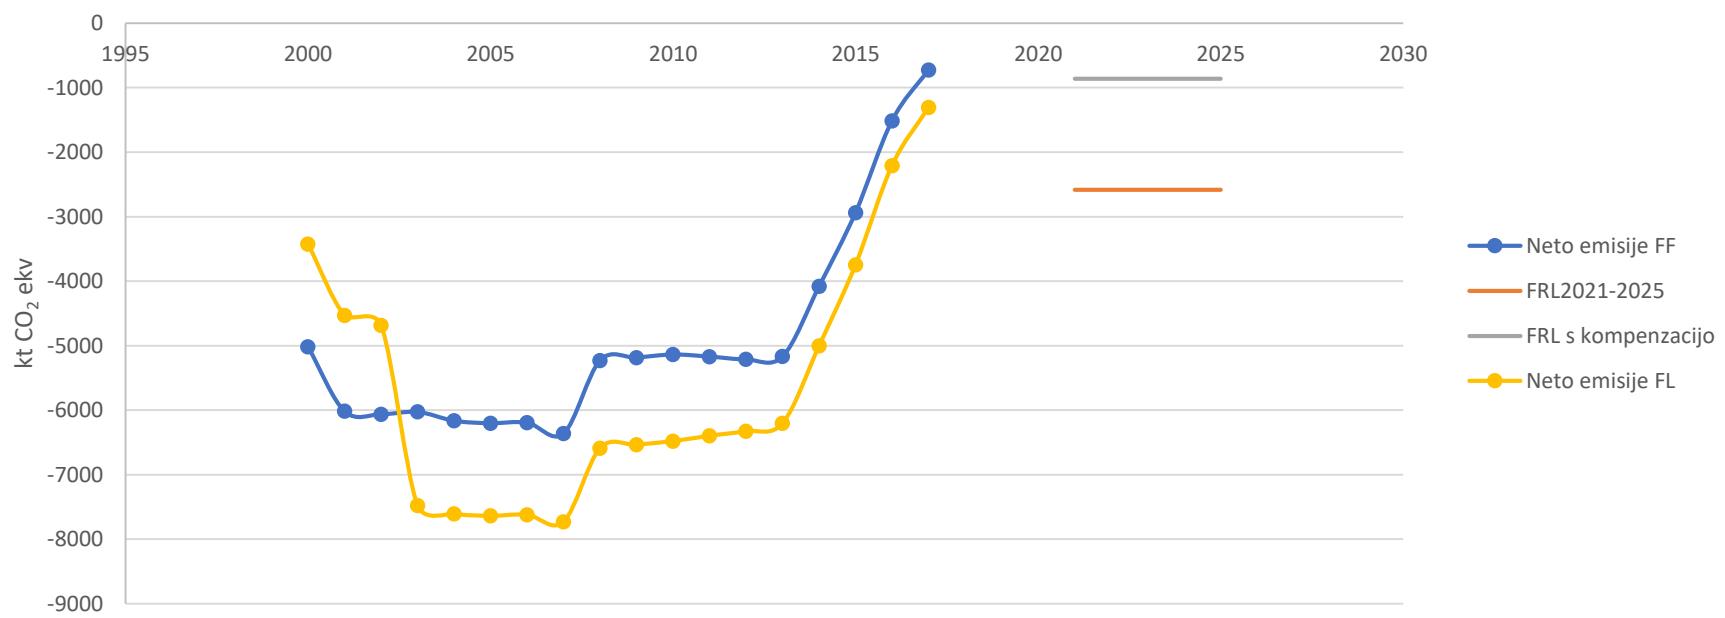

Sprememba lesne zaloge med leti 2000 in 2018 za iglavce in listavce (levo) in za glavne drevesne vrste (desno).

Odstotek poseka glede na glavne drevesne vrste (levo) in delež dreves, ki so odmrla med leti 2012 in 2018.

Obračunavanje emisij v gozdovih, Slovenija, NIR/LULUCF v l. 2019 B. Mali s sod. , GIS & ZGS & BF & MKGP

Rekordi zaradi naravnih ujm

V zadnjih letih so proizvodnjo gozdnih lesnih sortimentov (v nadaljevanju GLS) zaznamovale sanacije škod zaradi ujm (2014 in 2015 – žled; 2015, 2016 in 2017 – gradacija podlubnikov; 2018 – vetrogom), ki so botrovale vrsti rekordov v zgodovini slovenskega gozdarstva. Na primer:

- proizvodnja GLS je leta 2014 prvič presegla 5 milijonov m³;
- proizvodnja GLS iglavcev je leta 2015 prvič presegla 3 milijone m³;
- izvoz vseh vrst GLS je leta 2016 prvič presegel 3 milijone m³;
- izvoz hlodovine iglavcev je leta 2015 prvič presegel 1 milijon m³, leta 2016 je bil rekordnih 1,8 milijona m³;
- zunanjetrgovinski presežek GLS je prvič presegel 2 milijona m³ v letu 2015 in se v letu 2016 povzpel že nad 2,5 milijona m³;
- zunanjetrgovinski presežek hlodovine iglavcev je leta 2016 prvič presegel 2 milijona m³.

Mag. Mitja Piškur, SiDG, Korenina, april 2019
