

Supplementary table 1: Multivariate Cox regression analysis of histologic variants and individual components of composite scores nuclear grade and mitosis-necrosis score in the eMPM patient cohort.

		Multivariate analysis		
		HR	95% CI	p-value
Histologic variant	solid/trabecular tubulopap./microcystic	1.24	0.83-1.85	0.295
Nuclear atypia	1 2 3	1.24	0.83-1.86	0.301
Mitotic count	low (≤ 1) intermediate (2-4) high (≥ 5)	1.07	0.83-1.38	0.592
Necrosis	present absent	2.03	1.38-3.00	<0.0001

HR, hazard ratio; CI, confidence interval, tubulopap., tubulopapillary
