

SCIENCE WRITER

4 August 2021

This is to confirm that I have proofread the manuscript entitled **Old buildings need new ideas: using Heritage Building Information Modelling for the holistic integration of data as a new approach to the conservation-restoration process**. It is now free of any significant grammatical errors and is written in a clear and easily understandable style. If you have any questions, please do not hesitate to contact me.

Yours faithfully

Paul McGuinness, Ph.D.
